**Christine Rodriguez**  
Program Executive Officer  
Manpower, Logistics and Business Solutions

Many of you may not have heard of the Department of the Navy’s (DON) Program Executive Office for Manpower, Logistics and Business Solutions (PEO MLB), but the defense business IT systems that we deliver are critically important to the daily operations of the Navy and Marine Corps. We provide the services that our customers need to focus on and complete their mission.

Our services touch the lives of every Sailor, Marine and DON civilian. We enable force readiness through logistics, supply chain and manpower solutions. Our logistics portfolios ensures Naval platforms and weapons systems are operationally available by optimizing and modernizing legacy logistics IT systems. Our supply chain management platforms provide commanders with near real-time status on supply, maintenance and service requests. Our manpower solutions delivers the tools Sailors and Marines need to manage their careers and the training to maintain the competitive edge. Our financial systems executes and enables the payment of more than \$145 billion of the Navy’s financial obligations each year, representing more than 50 percent of the Navy’s Total Obligation Authority. Our time and attendance systems track millions of hours of employment data every pay period, enabling the accurate and timely processing of military and civilian pay.

In delivering these services, we focus on customer service while accelerating and innovating the IT acquisition process and modernizing the IT systems used by the DON. Working together with our resource and functional sponsors, we are evolving and delivering modern capabilities and technologies to maintain the competitive edge while meeting the demands of our user communities. The challenge is delivering the tools required by the DON with speed, agility and affordability.

The tools and business systems that we deliver are the heartbeat of the DON. Business systems increase capacity and capability through information intelligence and data-driven solutions that enable the DON to operate smarter with information business decisions through advanced analytics. Our defense business systems enable the daily operations of the DON in staffing, training, organizing and equipping Navy and Marine Corps forces around the globe. Learn more about our work in this portfolio overview book of PEO MLB’s services.

Christine Rodriguez  
Program Executive Officer for Manpower, Logistics and Business Solutions

# Accomplishing the business of the DON

Changing how the DON does business.  
Doing our job so warfighters can do theirs.

## Program Executive Office for Manpower, Logistics and Business Solutions

### Who We Are

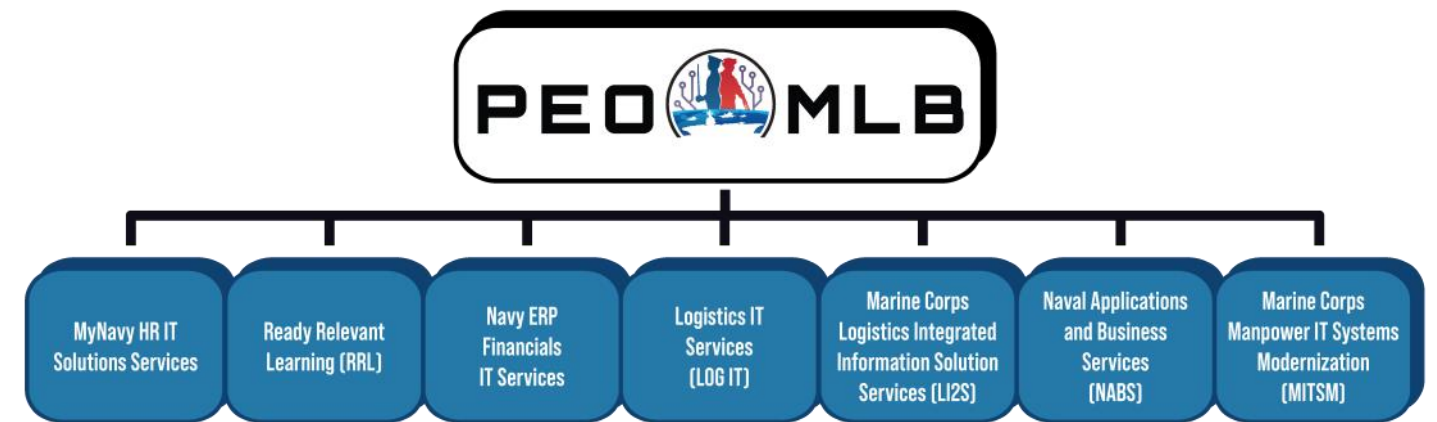

The Program Executive Office for Manpower, Logistics and Business Solutions (PEO MLB) is the Department of the Navy's (DON) manpower, logistics and business solutions information technology (IT) acquisition agent. The systems and solutions PEO MLB develops, acquires and delivers are the backbone enabling the DON's day-to-day business and financial operations. PEO MLB provides Sailors, Marines, DON civilians and their support systems with the services needed to complete their missions and tools to manage their careers.

PEO MLB is a modern service delivery organization aligned around capability portfolios. This structure allows for a customer-focused, holistic approach to doing business by increasing efficiency, reducing duplication and improving collaboration.

PEO MLB was established in May 2020 to realize the DON's vision of digital transformation by optimizing program alignment across the Navy and Marine Corps capability portfolios and enabling more agile delivery of IT capabilities to a complex and diverse set of customers.

### Value to the DON

- Delivering economies of scale by rationalizing services and using capability-based portfolio structure
- Providing accurate financial information to support decisions, financial auditability and compliance regulations
- Integrating/automating supply chain management platforms that provide leaders/Commanders with near real-time status visibility on supply and maintenance postures
- Developing cost-efficient applications based on agile methodology and open source technologies to maximize the return on investment
- Standardizing data architecture across Department of Defense information domains
- Utilizing the cloud, commercial off-the-shelf (COTS) systems and other non-developmental solutions to reduce life cycle sustainment costs

### Our Portfolio

- **MyNavy HR IT Solutions Services:** Provides total life-cycle management and modernization for the Navy's human resource IT capabilities through an integrated portfolio of systems, services and applications.
- **Ready Relevant Learning:** Modernizes the Navy's training model to improve Sailor performance and enhance mission readiness.
- **Navy ERP Financial IT Services:** Delivers business-critical auditable solutions and services for financial, time/attendance and supply chain management.
- **Logistics (LOG) IT Services:** Modernizes about 300 Navy and Marine Corps logistics IT systems to a single integrated Naval portfolio of systems, services and applications deployed ashore and afloat.
- **Marine Corps Logistics Integrated Information Solutions (LI2S) Services:** Delivers deployable, single point-of-entry solutions with cutting edge technology to support modernized logistics operations.
- **Naval Applications and Business Services:** Delivers enterprise business applications and services that support Navy and Marine Corps warfighters, earning high customer satisfaction by using best practices and common Naval solutions to reduce operating costs and speed delivery.
- **Marine Corps Manpower IT Systems Modernization:** Modernizes the Marine Corps' legacy manpower applications and develops new capabilities in support of Talent Management 2030.

## PEO MLB Technical Director Office

### Who We Are

The PEO MLB Technical Director Office (TDO) was established in November 2022 by merging the Technical Director, Data Transformation Services and Innovation Support Services teams into a single office. The PEO MLB TDO supports PEO MLB portfolios in reaching their goals, aligning and balancing capabilities and resources across the PEO and facilitating a culture shift within the PEO to better adopt and embrace new operational philosophies, strategies and approaches.

The TDO enables agile innovative technology services throughout PEO MLB by providing services, policies and processes that enhance the continual evolution of technology adoption within the PEO. The TDO is the first point of contact for potential PEO industry partners.

### Value to PEO MLB

- Supports PEO MLB portfolios in reaching their goals
- Aligns and balances capabilities and resources across the PEO
- Facilitates a culture shift within the PEO to adopt and embrace new operational philosophies, strategies and approaches

### Our Portfolio

The TDO is organized into four product lines:

- **Innovation Consulting Services** builds a culture of innovation and improves customer experience by leveraging human-centered design principles, tools, methods and measures.
- **Digital Agility** empowers users with technical guidance to accelerate the adoption of digital tools.
- **Technical Strategy and Governance** drives PEO MLB technical strategy and vision and advises portfolios on alignment and implementation of Department of the Navy/Department of Defense policy.

#### Research and Development Funding Streams

The TDO assists PEO MLB portfolios and programs through the process for receiving Naval Innovative Science and Engineering (NISE) and Small Business Innovation and Research (SBIR) funding. Proposals for NISE are submitted annually in the spring. The SBIR program is competitive and encourages domestic small businesses to engage in Federal Research/Research and Development (R/R&D). Proposals for SBIR are submitted on an as-needed basis. For more information, contact the TDO.

#### Industry Engagement

The TDO holds weekly Initial Capability Discussions, which allow opportunities for potential industry partners to engage with PEO MLB. This is the official process for potential industry partners to connect with the PEO.

Initial Capability Discussions are weekly introductory meetings to determine if a company has a service or capability that meets a current or future PEO MLB need. Each week, two companies are given no more than 15-minutes each, including question and answer time, to introduce their services and capabilities to PEO MLB. If PEO MLB can benefit from a company's capabilities, the company may be referred to a PEO MLB portfolio for further discussion.

For more information about the TDO or to register for an upcoming Initial Capability Discussion, email

[mlb\\_tdo@us.navy.mil](mailto:mlb_tdo@us.navy.mil)

## TDO Services

### Innovation Consulting Services

- **Customer Experience** builds and implements enterprise Voice of the Customer (VoC) strategy, process, tools and metrics to collect, analyze and improve customer experience across the organization.
- **Design Thinking Workshops** provides facilitated design thinking workshops with key stakeholders to define, prioritize and solve problems while methodically and collaboratively using a human-centered design approach.
- **Workforce Agility/Training** coordinates monthly PEO-wide training day events including Learning With Leadership sessions.
- **Industry Engagement** brings awareness of industry offerings and opportunities to PEO MLB by holding weekly presentations with companies.

### Digital Agility

- **Innovation Day** is a recurring event that empowers PEO MLB's workforce and their customers to share ideas or suggestions to help improve our workforce, culture, service offerings or customer experience.
- **M365 Championing and Support** supports the transition to and adoption of the Microsoft Office 365 suite of capabilities. Shows users the realm of the possible on how to use M365 to improve everyday work life. Removes barriers to adoption by providing guidance and governance on use and connecting users to available support resources and training.
- **Enabling Digital Modernization** helps guide programs through determining the potential courses of action when aiming to modernize their current systems and applications. Provides technical guidance, consulting and support in conjunction with technical compliance to provide SME support for organizations looking to modernize a digital tool.
- **Digital Tool Adoption** evaluates digital tools for potential PEO MLB use and integration while avoiding potential technology redundancies.
- **Executive Dashboard** provides metrics to PEO MLB leadership to enable sound, data-driven management decisions and continuous process, product and service delivery improvement.

### Technical Strategy and Governance

- **Technical Strategy and Vision** provides strategic guidance and a technology roadmap to shape the future state of technology for PEO MLB.
- **Policy/Standards Review and Alignment** ensures PEO MLB is a stakeholder in the development of DoD/DON policies and standards. Consults PEO MLB portfolios in the implementation of guidance, policies and standards.

## INNOVATION CONSULTING SERVICES

*Builds a culture of innovation and improves customer experience by leveraging human-centered design principles, tools, methods and measures.*

### Services:

- Customer Experience
- Design Thinking Workshops
- Workforce Agility/Training
- Industry Engagement

## DIGITAL AGILITY

*Empowers users with technical guidance to accelerate the adoption of digital tools.*

### Services:

- Innovation Day
- M365 Championing and Support
- Enabling Digital Modernization
- Digital Tool Adoption
- Executive Dashboard

## TECHNICAL STRATEGY AND VISION

*Drives technical strategy and vision and advises portfolios on alignment and implementation of DON/DoD Policy.*

### Services:

- Technical Strategy and Vision
- Policy/Standards Review and Alignment

## WHAT WE DO

PEO MLB partners with our customers and stakeholders to acquire creative and innovative solutions that address the complex challenges of operating a globally distributed workforce.

## WHAT WE DELIVER

Our portfolio of programs delivers a broad range of defense business IT solutions to support the day-to-day administrative and operational needs of Sailors, Marines and a civilian workforce around the world.

## MyNavy HR IT Solutions Services

## Who We Are

MyNavy HR IT Solutions Services is the single IT acquisition agent for N1 business operations providing total life cycle management to support the Navy's human resource IT capabilities. MyNavy HR IT Solutions manages an extensive portfolio of business applications, systems and initiatives delivering critical capabilities used by active and Reserve forces, civilians, retirees and Navy families 24/7 around the world. The portfolio includes Authoritative Data Environment (ADE), enterprise Customer Relationship Management (eCRM), Learning Stack (LS), Navy Personnel and Pay (NP2) and Single Point of Entry (SPOE), including MyNavy Portal (MNP) and the Navy App Locker (NAL) containing over 80 official Navy Apps and counting.

Individual business applications and assets within MyNavy HR IT Solutions align with portfolios organized by capability, providing a “big picture” to analyze and inform IT investment decisions. From position management, workforce development, distribution, personnel and pay, recruiting and accessions, the lines-of-business support Navy customer capabilities and sponsor requirements.

## Value to the DON

- Extensive expertise in the rapid development and delivery of Defense Business Systems
- Economies of scale using portfolio management in a competency-based organization
- Cradle to grave life cycle support
- A diversified and distributed team provides exceptional talent and continuity of operations

## Our Portfolio

**Authoritative Data Environment (ADE):** An integrated solution that will result in the rationalization of accurate data, and enable Navy leaders to make more informed decisions.

**enterprise Customer Relationship Management (eCRM):** A commercial off-the-shelf (COTS) capability that integrates business processes, supporting systems and authoritative data that is integral to the Navy Personnel Command (NPC) and the Navy Recruiting Command (NRC) Transformations.

**Learning Stack (LS):** A cloud-based portfolio of modern software applications providing capabilities to manage and deliver modernized training to Sailors at the right time and at the point of need, thus increasing mission readiness.

**Navy Personnel and Pay (NP2):** Combines personnel and pay functions into one seamless system with an improved user interface and maximized Sailor self-service.

**Single Point of Entry (SPOE):** A single self-service online entry portal that allows Sailors 24/7 access to HR systems and data, including:

- **MyNavy Portal (MNP):** Combines personnel, training and education websites into one easy-to-use location providing Sailors with a single self-service portal to manage their careers from the day they join to the day they separate.
- **Mobile Apps:** Delivered via the Navy App Locker (NAL), apps allow Sailors to take advantage of mobile applications for self-service human resource functions and increase the reach of training and information to Sailors.

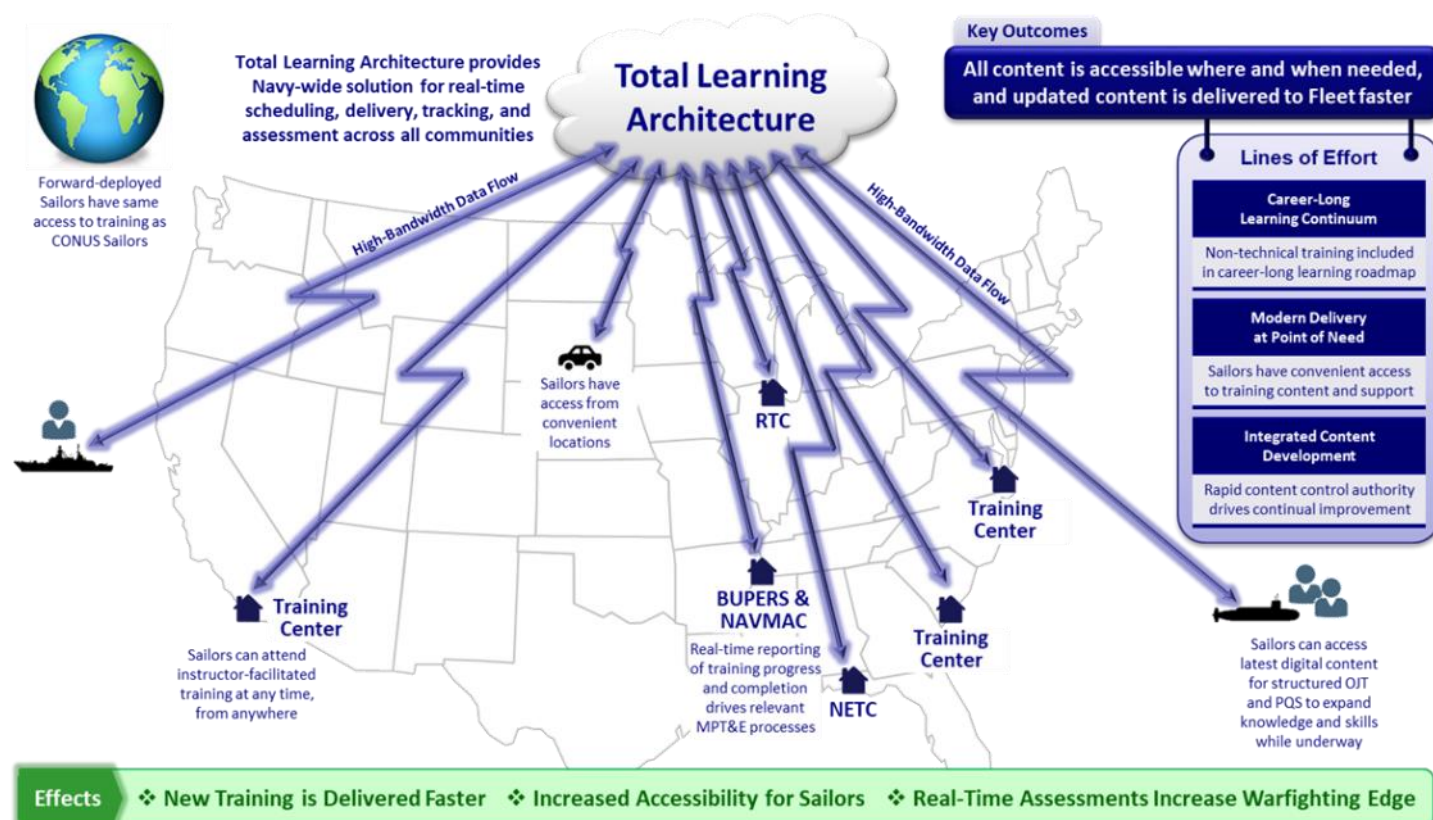

## Ready Relevant Learning

### Who We Are

Ready Relevant Learning (RRL) is driving change and modernizing how the Navy trains its Sailors. It is the Navy's long-term investment to enhance Fleet mission readiness by continually improving Sailor performance and ensuring they have the knowledge and skills to compete and win across the spectrum of conflict. RRL focuses on delivering the right training at the right time in the right way to ensure Sailors are ready to operate and maintain their equipment at the extreme technical end of its capability to win the high-end fight.

As one of three pillars of the Chief of Naval Personnel's Sailor 2025 initiatives, RRL provides timely, relevant training at the most appropriate time in a Sailor's career. RRL uses an agile, multi-path approach to equip our operators with the knowledge they need on the deck plates to succeed in combat. RRL leverages training technology ranging from simple visual demonstration tools and videos to more complex, immersive simulators and virtual trainers. These modern tools enhance the effectiveness and efficiency of training through repetition and "hands on" performance-based fundamentals. RRL breaks the Navy out of our dependence on "brick and mortar" schoolhouses and delivers modernized training material to the actual point of need. Training will be delivered on the waterfront, flight line and eventually available on our afloat units.

### Value to the DON

- Learning roadmaps link requirements with real-world Fleet needs so Sailors get the right training at the right time throughout their careers resulting in Sailors who can out-think, out-decide and out-fight any potential adversary
- Modernized training content and multiple delivery options to accelerate learning, minimize atrophy and provide on-the-job performance support, which contributes to the creation of a combat-ready force
- Significant reductions in the cost and time for getting the most relevant training to the Fleet, thereby increasing agility in a rapidly changing world

### Our Portfolio

RRL is a holistic approach to reimagining how the Navy trains its Sailors. RRL focuses on WHEN, HOW and WHERE we train, which ensures training is as relevant as possible to the real-world needs of the Fleet. This requires sustained focus across three lines of effort:

**Career-Long Learning Continuum:** Developing detailed learning roadmaps for every Navy career covering technical, professional and leadership content with requirements linked to real Fleet needs.

**Modern Delivery at Point of Need:** Establishing the information architecture that supports multiple delivery options and increases access to Sailors, accelerating learning and enhancing training effectiveness.

**Integrated Content Development:** Enabling faster delivery of Fleet-relevant content to provide increased operational agility with processes, standards and resources aligned for efficiency.

## Navy ERP Financial IT Services

### Who We Are

Navy Enterprise Resource Planning (ERP) Financial IT Services is a portfolio of finance, supply chain and complementary solutions that provides the Department of the Navy (DON) with business tools and capabilities used to align and manage the Navy's money, manpower and materials. The portfolio includes Navy ERP and Standard Labor Data Collection and Distribution Accounting (SLDCADA).

The portfolio team develops and sustains business IT solutions that DON enable leadership to effectively obtain, allocate and manage resources to complete the mission. By automating previously manual processes and seamlessly integrating a suite of electronic resource planning, procurement and workforce management business systems, Navy ERP Financial IT Services enables the Navy business enterprise to budget, account for and audit its activities so that it can monitor and make data-driven decisions to benefit Sailors, Marines and U.S. taxpayers.

### Value to the DON

- Allows for more proactive planning for Fleet needs, decision-making and solutions
- Enhances mission performance and financial accountability from headquarters down to field activities
- Provides accurate information accessible anytime and anywhere in the DON to support timely decisions, financial auditability and regulatory compliance
- Improves the DON's knowledge of business operations to increase Fleet readiness

### Our Portfolio

**Navy Enterprise Resource Planning (ERP):** The Navy's financial system Program of Record (POR), ERP is a software portfolio comprised of finance, acquisition, supply, workforce management and grants management modules that are components of the commercial Systems Applications and Products (SAP). To date, Navy ERP has been deployed to more than 87,000 users from 17 active Navy systems commands and facilitates more than \$145 billion in financial transactions annually, which is more than half of the Navy's Total Obligation Authority. In December 2013, Navy ERP attained Full Operational Capability for Department of Defense (DoD) business systems. The system received a technology refresh in August 2019 and upgraded to the SAP high performance analytic appliance cloud-based platform, resulting in more efficient operations with increased memory, additional data storage and faster processing, making it the Navy's largest IT system to migrate to the cloud. In April 2020 Navy ERP transitioned from a sustainment posture to a scalable, agile program to better support the DON's readiness and modernization priorities.

**Standard Labor Data Collection and Distribution Application (SLDCADA):** With more than 52,000 users across the globe, SLDCADA is one of two DON POR applications for time and attendance. It facilitates more than 4.3 million hours of employment data entry every pay period for the Navy, Marine Corps and the Executive Office of the President. SLDCADA is designed for accurate, reliable time attendance management, with key features including traceability to tasks, improved auditability and customizable reporting. It is hosted on the Amazon Web Services cloud environment and backed by the Naval Information Warfare Center Atlantic Data Center and Cloud Hosting Services.

## Logistics IT Services

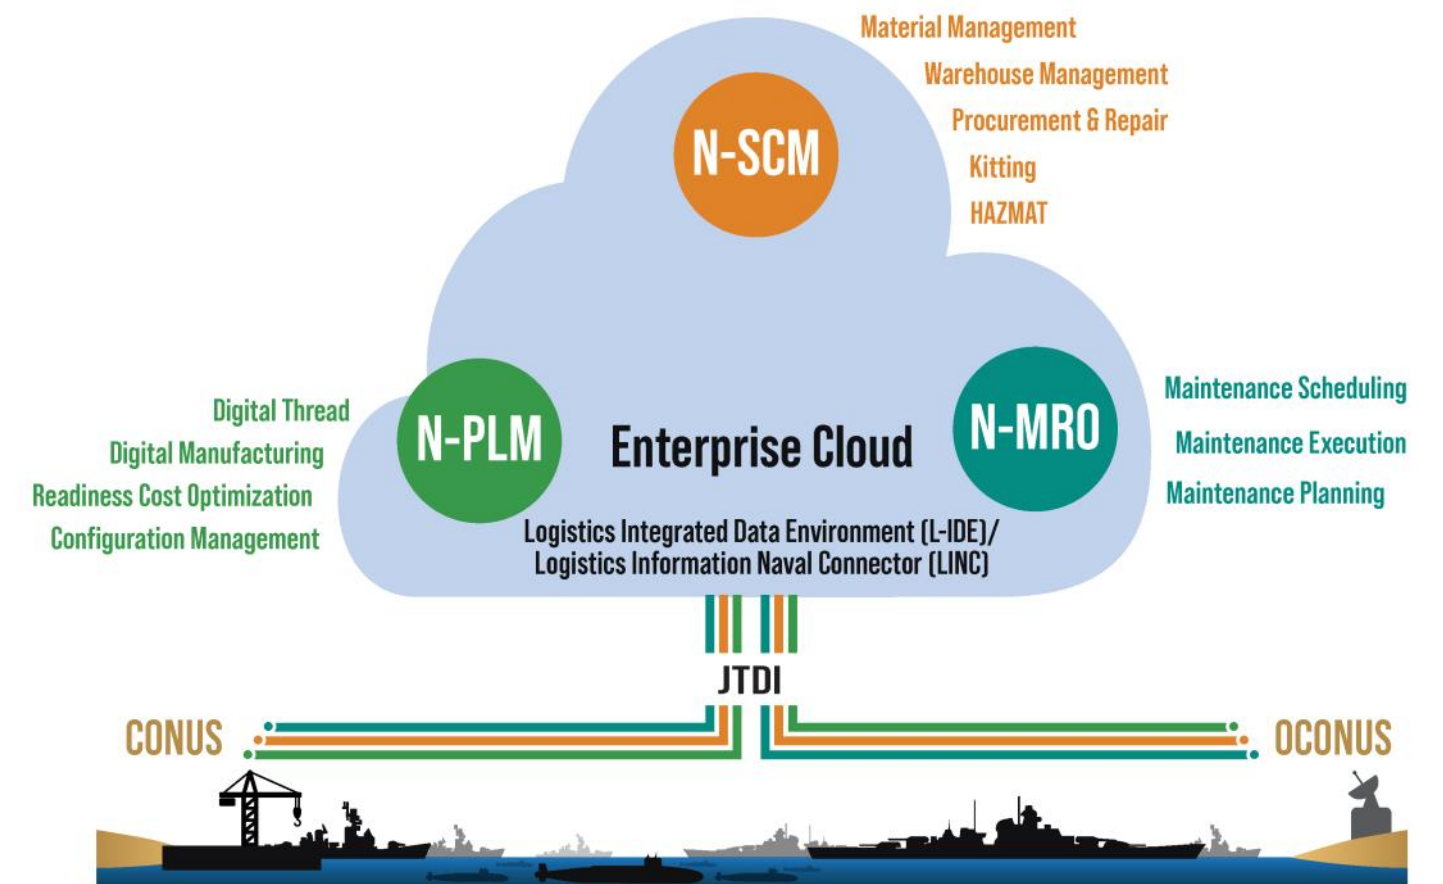

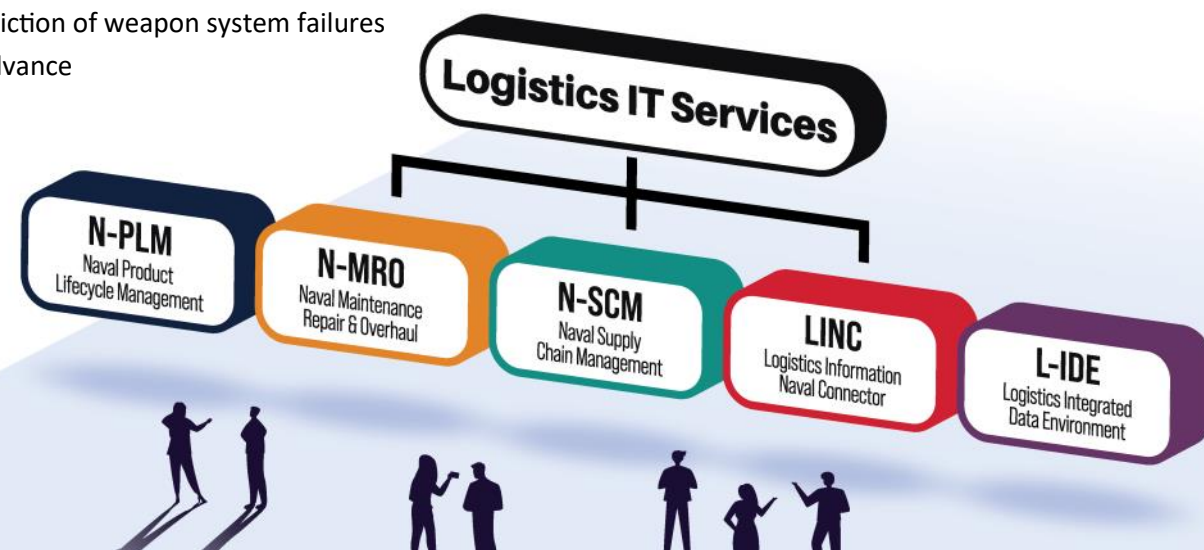

### Who We Are

In December 2020, the Program Executive Office for Manpower, Logistics and Business Solutions (PEO MLB) assumed management of the Naval Logistics (LOG) IT Digital Transformation and created the LOG IT Services portfolio. The Naval LOG IT Digital Transformation supports the Chief of Naval Operation's (CNO) Navigation Plan and vision for Naval LOG transformation across the Department of Navy (DON). LOG IT transformation is a capability differentiator, critical to competing with adversaries and winning the high-end fight. Further, it enables our Naval platforms, weapon systems and associated infrastructure, to be more ready, agile, efficient and cost effective.

PEO MLB's LOG IT Services provides the required IT services to keep Naval platforms and weapons systems operationally available by optimizing and modernizing more than 200 DON legacy LOG IT systems.

### Value to the DON

- LOG IT Digital Transformation is a critical enabler to increasing Naval platform and weapon system operational availability.
- LOG IT's approximately \$1 billion annual budget enables:
  - Enhanced readiness-based decision support
  - Optimized maintenance planning, scheduling and execution
  - Digital thread of data tied to a weapon system
  - Utilization of 3D product models for augmented reality and virtual reality
  - Transformation and improvement of failure and maintenance data
  - Prediction of weapon system failures in advance

### Our Portfolio

LOG IT applications will be deployed to approximately 309 ships and submarines, 250 aviation squadrons and 158 ashore/expeditionary units and used by more than 150,000 users, afloat and ashore. The Naval LOG IT Digital Transformation has five lines of effort.

**Naval Product Lifecycle Management (N-PLM)** manages weapon system technical data required for lifecycle support (configuration, bill of material, 3D models, readiness models, drawings, maintenance procedures).

**Naval Maintenance Repair & Overhaul (N-MRO)** plans, predicts, schedules and executes maintenance at the organizational, intermediate and depot levels.

**Naval Supply Chain Management (N-SCM)** plans, procures, receives, stores, distributes, disposes and manages material, goods and services across all commodities and communities.

**Logistics Information Naval Connector (LINC)** provides a common platform hosting environment for LOG IT systems and applications and facilitates data exchange and integration between modernized, legacy and external IT systems.

**Logistics Integrated Data Environment (L-IDE)** aligns readiness data systems to support the other four pillars, enable analytics and supports broader data efforts.

## Marine Corps Logistics Integrated Information Solutions Services

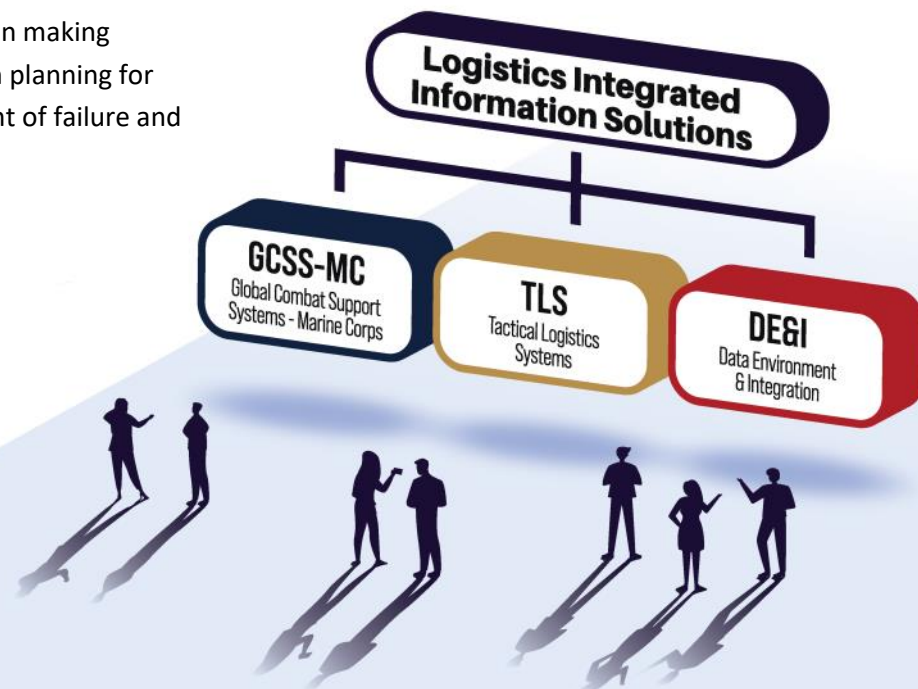

### Who We Are

Marine Corps Logistics Integrated Information Solutions Services (LI2S) delivers deployable, single point-of-entry capabilities with cutting edge enabling technology in support of logistics operations across the Marine Corps, while facilitating the modernization of aged logistics processes and procedures. Critical performance objectives include delivery in a disadvantaged or disconnected environment, reduced logistics response and customer wait times and decreased dependence on forward-positioned stockpiles.

The mission of LI2S is to transform and deliver state-of-the-art systems and services that enable the highest performance and readiness of Marine Corps logistics operations worldwide.

### Value to the DON

- Automated supply chain management platforms that provide Commanders with near real-time status on supply, maintenance and service requests
- Integrated supply and maintenance data that facilitates a clear common operational picture for Commanders throughout an area of operation in both technologically robust and austere operating environments
- Maintenance data collection capability provides increased equipment accountability and maintenance analysis across the Marine Corps
- Decision support assists leaders in making informed courses of action when planning for Transformation and improvement of failure and maintenance data

### Our Portfolio

LI2S is conducting a Critical Data Analysis (CDA), which is a disciplined and consistent enterprise-level implementation of model-based engineering that enables the delivery of systems that support Marine Corps operational logistics success in contested operating environments, with a focus on tactical logistics functions as described in the Marine Corps' Expeditionary Advanced Basing Operations (EABO) future operating concept. Modeled logistics IT systems are capable of supporting operations in Denied, Degraded, Intermittent or Low-bandwidth (DDIL) communications and otherwise contested operating environments.

**Global Combat Support System-Marine Corps (GCSS-MC):** To develop and implement deployable, leading-edge technology that enables logistics modernization and maximizes combat effectiveness of the Marine Corps through improved logistics visibility.

- Desktop Virtualization: Allows the user to interface with GCSS-MC in a highly degraded environment without the adverse effects that a high latency low bandwidth provides
- Email Mobile Query: Allows business data and operations to take place via an e-mail interface

#### Tactical Logistics Systems (TLS)

Develop and deploy disconnected and mobile logistics information technology tools to provide enhanced warehousing and inventory management enabling increased logistics visibility and capability to the Marine Corps.

- Telemetry - fusing information from multiple repositories of logistics information and graphically displaying it on the user-defined operational picture
- Marine Air-Ground Task Force (MAGTF) Logistics Support Systems (MLS2) Cloud Migration initiative enables migration of the Transportation Capacity Planning Tool (TCPT), Common Logistics Command and Control System (CLC2S) and web-Storage Retrieval Automated Tracking Integrated System (STRATIS) into a Government-approved cloud environment and the tactical communication network architecture

**Data Environment & Integration (DE&I):** Dedicated to providing the Marine Corps logistics community with transformational capabilities that will streamline business processes, improve data quality and greatly enhance overall user experience. DE&I programs offer analytical capabilities to unify and integrate data from disparate sources to produce effective, actionable business intelligence throughout the logistics chain of command.

- Technical Data Management (TDM)-Catalyst: Provides Item Master (catalog) and provisioning capabilities
- Logistics Data Services (LDS)/Data as a Service (DaaS) within the MCBOS environment
- Access to GCSS-MC in DDIL operating conditions

## Naval Applications and Business Services

### Who We Are

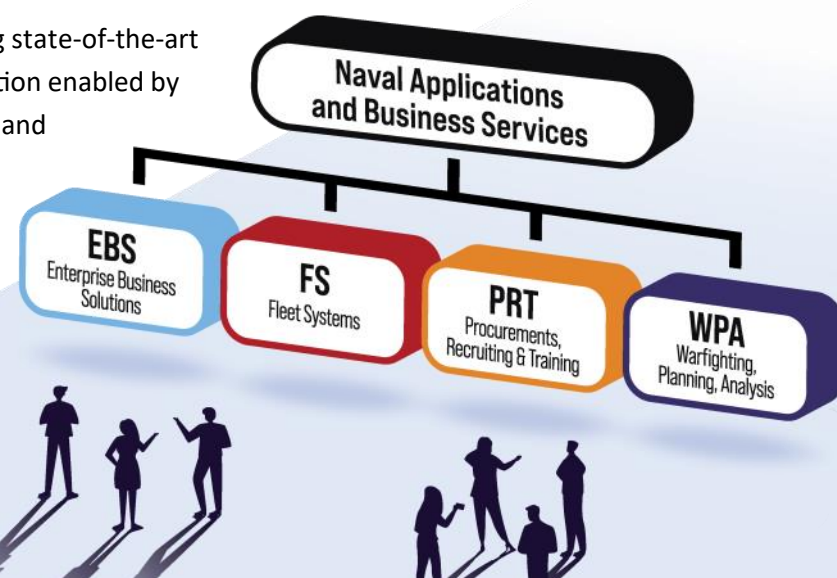

Naval Applications and Business Services (NABS) oversees a portfolio of enterprise-wide information technology (IT) programs designed to enable common business processes and provide standard IT capabilities to Sailors at sea, Marines in the field and other Department of Defense (DoD) customers.

NABS leverages the best practices of the Adaptive Acquisition Framework and latest technologies to deliver rapid and evolving capabilities to meet the ever-changing environment and need of customers and warfighters. Agile methodology and open-source technologies are applied to rapidly develop software solutions, which reside in cloud-hosted environments that are in line with industry best practices and maximize the return on investment. Maximizing the customer experience while driving agile capability delivery that keeps pace with digital technology through innovation is the foundation of every program within NABS.

NABS is made up of four portfolios: Enterprise Business Systems (EBS), Fleet Systems (FS), Procurements, Recruiting and Training (PRT) and Warfighting, Planning, Analysis (WPA).

### Value to the DON

- **Improved affordability:** Developed and is executing an overarching technical vision that emphasizes looking first at cloud, commercial off-the-shelf (COTS) solutions to make initial system acquisition less costly and to reduce life-cycle sustainment costs
- **Increased agility:** Aggressively employing Software Acquisition Pathway to reduce typical acquisition timelines by up to two years
- **Improved Customer Experience:** Applying state-of-the-art technology and an emphasis on collaboration enabled by agile practices and development, security and operations (DevSecOps) creates increased customer ownership and buy-in

### Our Portfolio

**Enterprise Business Systems (EBS):** The EBS portfolio aligns with and executes the Secretary of the Navy's strategic guidance priority to innovate and modernize using agile development, pilot programs and Other Transaction Authority to accelerate delivery of software solutions to our Sailors and Marines. EBS also aligns with the Secretary's priority of strengthening strategic partnerships by modernizing business systems to enhance performance and affordability. As a leader in improving affordability using commercial off-the-shelf (COTS) solutions, EBS delivers improved customer experience to our world-wide user community while ensuring cybersecurity.

**Fleet Systems (FS):** Enables enterprise-wide common IT processes and standard capabilities, while maximizing the user experience and evolving agile at scale. The mission critical programs in this portfolio deliver adaptable and flexible mission-essential capabilities aimed at improving data-driven decision making at strategic and tactical levels. These programs drive rationalization and modernization of business systems, processes and organizational functions.

**Procurements, Recruiting and Training (PRT):** Delivers high-quality, well-engineered and value-added IT capabilities that facilitate the Marine Corps procurement process, enables Marine Corps recruiting by managing the Human Resources Development Process from the first contact with a recruit, and supports the Marine warfighter training mission.

**Warfighting, Planning, Analysis (WPA):** Delivers high-quality, well-engineered, and value-added IT capabilities that enable and support the full spectrum of force planning, readiness, analysis, expeditionary electronic health records and the enterprise management of medical logistics.

## Marine Corps Manpower Information Technology Systems Modernization (MITSM)

### Who We Are

Marine Corps Manpower Information Technology Systems Modernization (MITSM) is to modernize legacy applications and develop new capabilities to operationalize the Commandant of the Marine Corps' (CMC) vision for a modern talent management IT portfolio of capabilities that has the ability to leverage data analytics to optimize manpower management outcomes. MITSM will enable the Marine Corps to recruit, support and source the right Marine at the right time and place with the right skills and abilities leveraging a modernized talent management portfolio of IT capabilities.

### Value to the DON

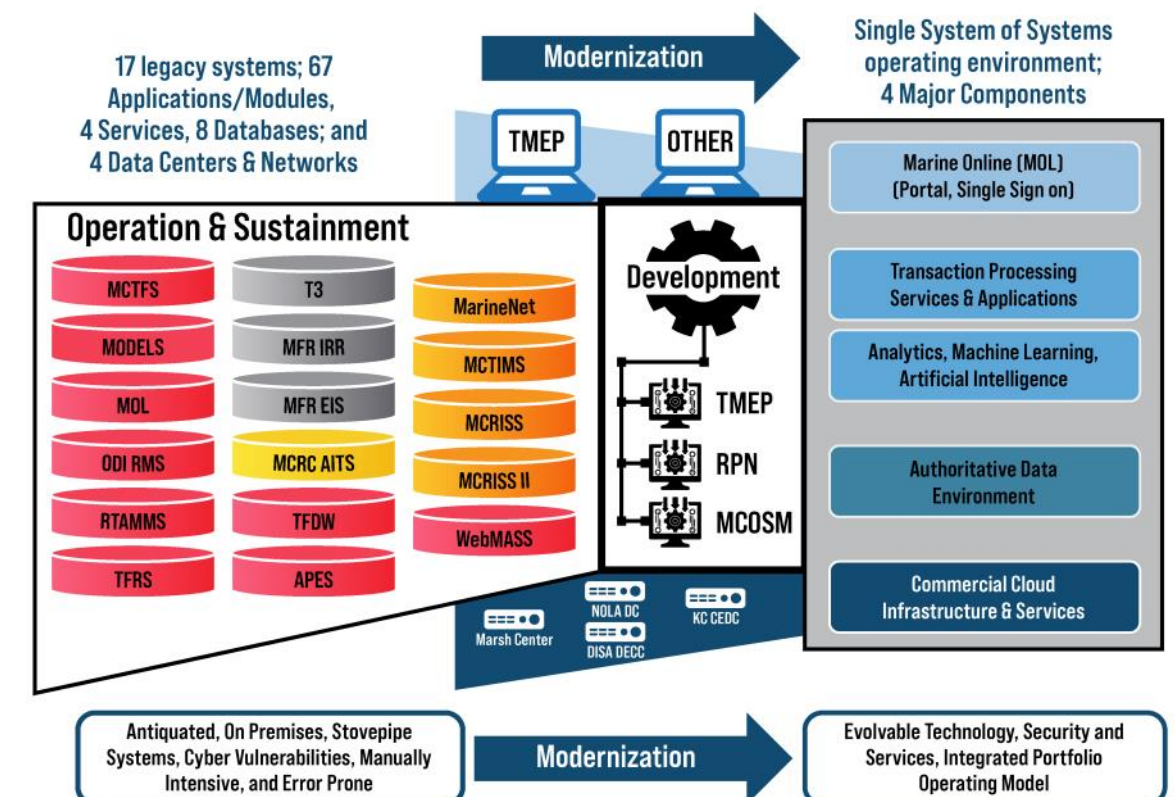

- Operationalize Marine Corps Talent Management 2030 strategy in support of future force design goals
- Enable and execute Marine Corps Manpower and Reserve Affairs information technology modernization
- Modernize Marine Corps legacy applications to maximize cloud technologies including Artificial Intelligence (AI) / Machine Learning (ML)

### Our Portfolio

**Modernization:** Develop a modernized officer and enlisted personnel models to better balance retention and recruiting. Emphasize data analytics across the recruiting enterprise. Retool how we assign our enlisted recruits to military occupational specialties. Streamline and digitize to reduce obstacles to reenlistment and save leaders' time. Adopt digital mechanisms and tools to enhance the reenlistment process. Equip our boardrooms with decision support tools to aid briefers in the critical task of choosing our future leaders. Powered by Artificial Intelligence, these tools will offer a wide range of options for interrogating, analyzing, and visualizing the tremendous data at our fingertips. In addition to saving a briefer time. Implement sophisticated, cloud-based, mobile-device accessible HR software. Current efforts are: Talent Management Engagement Portal (TMEP).

**Legacy Manpower Applications:** In partnership with the Marine Corps Technology Services Organization (TSO), maintain secure, auditable web applications for the Marine Corps serving both the Active and Reserve components. Provide software and systems sustainment support for pay and HR capabilities.
